# ACM-7000

## Stereo Headphone For Kids

We've all seen this scenario: A mother or father gives their child headphones to watch a movie on a portable DVD player, but the headphones are too big. Sadly, the kid is unable to enjoy the movie due to discomfort. This is where the ACM-7000 really shines. The ACM-7000 stereo headphones keep children in mind by providing them with a sleek, comfortable, and sturdy headphone they can call their own. The stereo drivers give children the audio they expect from a quality headphone without blasting out their eardrums. For kids, the ACM-7000 is the perfect fit.
